## Project Data Sheet

**Title** UV Bike Racks

**Location** The University Village, Sacramento, Ca

**Description** These bike racks are not your everyday bike racks. There are three different designs that are similar in nature with one another. The first bike rack is a leaf with decorative recycled glass inserted into the center. During the day the sunlight illuminates the glass giving this bike rack another dimension. The second bike rack is a lady bug with glass eyes. The dots are steel balls that can spin with a little push. We installed this one next to an ice cream shop for the little ones to enjoy. The third bike rack is a dragonfly with wildly large glass eyes. In the sun, they absorb sunlight and illuminate a bright aqua color.

**Date** 2017

**Medium** mild steel, recycled glass

**Dimension** 3'H x 3'W x 6"D

**Commissioned by** Merlone Geier Partners
